

Thanko Inc., to start selling “Neck Cooler Evo” at Amazon.com for US market.
Thanko Inc., known as Japan's gadget king, a leading provider of unique and useful products, step into US market.

<Product Overview>

Neck Cooler Evo is a wearable cooler that can be used by wrapping it around the neck.

Thanko's previous version neck cooler, Neck Cooler Neo, has been well accepted by customers. At the same time, we have received ideas and opinions on the model from the users for improvements. We have developed more advanced new model, Neck Coller Evo, to reflect such ideas and opinions.

When it is set on the neck, the plate cools in just about 2 seconds after the power on. The cooling system uses the same Peltier cooling system as a small refrigerator. Level of coolness can be switched between strong mode, weak mode, and fluctuate mode which automatically repeats strong and weak. The cooling plate temperature can be cooled down by about 15 degrees Celsius in strong mode and 10 degrees Celsius in weak mode, from the outside temperature.

It comes with a dedicated battery that can be attached to the unit, for cableless use. The dedicated battery lasts for about 1.5 hour in strong mode and about 2 hours in weak mode.

A mobile battery can be used as well. Just plug in the USB cable included in the package to the unit and a mobile battery, and time of use can be extended to about 10 hours in strong mode, and about 12 hours in weak mode, when fully charged 10000mA type mobile battery is used. To charge the dedicated battery, simply plug in the USB cable while it is attached to the unit.

Neck size of the unit can be adjusted to fit perfectly for any person. Lightweight of about 200g makes it comfortable to wear for a long time. It can be folded to make it compact to carry easily, in your pocket or bag, when not in use. Available in two colors, black and white.

Neck Cooler Evo is an excellent companion to carry in various occasions, such as, prevent summer heat, sports watching, bicycle/motorcycle ride, outdoor work, protect heat stroke, etc.

<Product Features>

- Wearable cooler that can be used by wrapping it around the neck
- Incorporates the same Peltier cooling method as a compact refrigerator
- Plate temperature is below 15 degrees Celsius from the outside temperature (in strong mode)
- Three switching modes of strong mode, weak mode, and fluctuate mode that automatically repeats strong and weak

Dedicated Battery Included Model Contents

- 【Body】
→ Dedicated Battery or USB can be used !
- 【Dedicated Battery】
- 【Size Adjustment Part】
- 【USB Type-C Cable】

It fits to any person

Adjustable neck size feature makes it fit to any person, short or tall, small or large.

※ Neck Size (approx.) : Min. 37cm (Size S) to Max. 50cm (Size 5D)

It weights as light as one banana

It weights only about 200g including battery, which is as light as one normal banana. This light-weight makes it possible to wear whole day long comfortably.

Dedicated Battery can be charged Without Detaching from the body.

When I used it at work, it sometimes slipped, so I want you to increase the holding power and make it harder to shift.

The holding force of the plate part is improved, so It becomes harder to shift even you move around!

Depending on the length of the hair, the hair gets caught in the fan. I want you to improve it.

We improved the design around the fan, so it becomes harder to get the hair caught.

The design feels a bit rugged, I'm a little worried about the eyes around me when I use it in my daily life ...

With new smart design, anyone can use it without hesitation, anywhere. Also, lightweight remains unchanged.

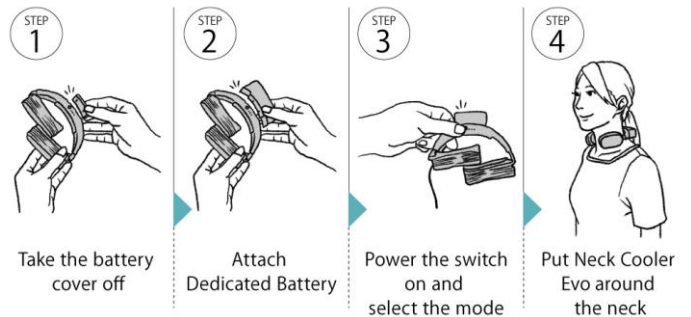

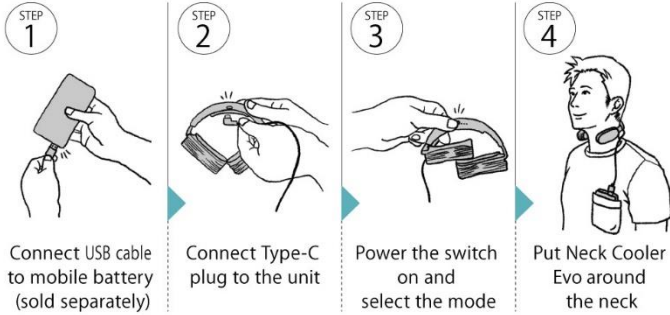

When using for a long time

Connect to Mobile Battery (sold separately) for longer time use

When you wish to use easily

Attaching Dedicated Battery for cableless use, without interfering your movement
