

FOR IMMEDIATE RELEASE

**SKYDESK PRINT ENABLES TO PRINT FILES FROM ANDROID MOBILE DEVICES****FACILITATES COMMUNICATIONS IN MOBILE WORK BY  
ALLOWING TO SHARE FILES AND PRINT**

**TOKYO, March 12, 2013** – Fuji Xerox Co., Ltd. today begins offering a free-of-charge application for Android mobile devices<sup>\*1</sup>: SkyDesk Print that enables to print files stored in SkyDesk Docs— an application for online document sharing and management of the SkyDesk Services<sup>\*2</sup>— through Fuji Xerox’s Net Print service<sup>\*3</sup> or multifunction devices/printers at offices.

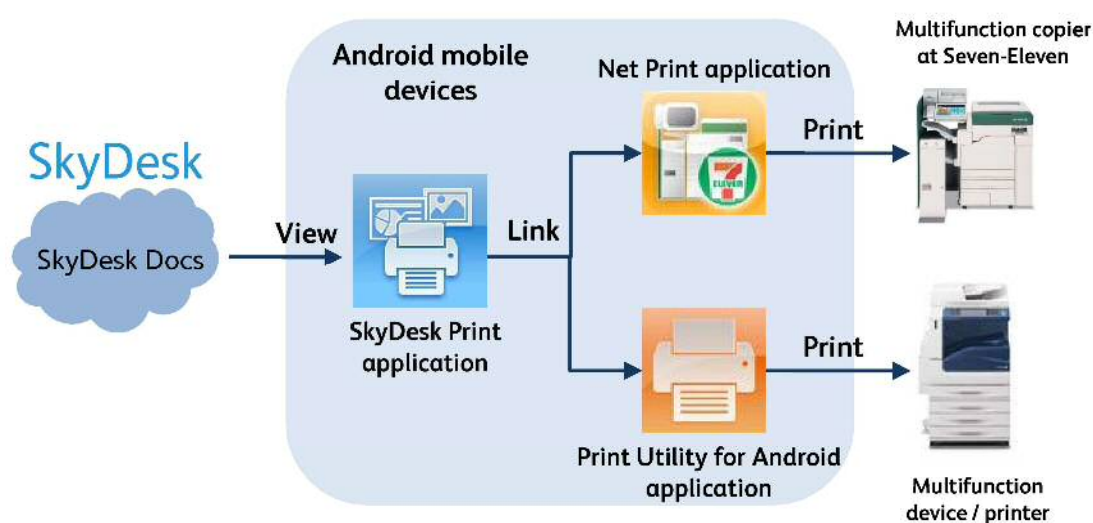

SkyDesk Docs is an application for Android mobile devices, which allows users to view and edit various documents and files stored and managed on the cloud. With SkyDesk Print, users can print files from their mobile devices.

**Linking with Net Print to respond to mobile printing needs**

Through Fuji Xerox’s Net Print service, users can print files<sup>\*4</sup> viewed with SkyDesk Print from multi-use copiers<sup>\*5</sup> installed at approximately 14,800 Seven-Eleven stores across Japan. This answers to the printing needs that emerge during mobile work on smartphones.

**Printing from multifunction devices and printers at offices**

By linkage with Print Utility for Android, a free-of-charge application for printing with multifunction devices and printers from Android devices via a wireless LAN network, users can now directly print files<sup>\*6</sup> on the mobile devices from SkyDesk Print.

**Linkage between SkyDesk Print and other applications**

To download the SkyDesk Print application, please access:
