

FOR IMMEDIATE RELEASE

SKYDESK PRINT ENABLES TO PRINT FILES FROM IOS MOBILE DEVICES**FACILITATES COMMUNICATIONS IN MOBILE WORK WITH THE FREE-OF-CHARGE APP**

TOKYO, May 9, 2013 – Fuji Xerox Co., Ltd. today begins offering a free-of-charge application for iOS mobile devices^{*1}: SkyDesk Print that enables to print files stored in SkyDesk Docs— an application for online document sharing and management of the SkyDesk Services^{*2}— through Fuji Xerox’s Net Print service^{*3} or multifunction devices/printers at offices.

SkyDesk Docs is an application for iOS mobile devices, which allows users to view various documents and files stored and managed on the cloud, as well as to upload image files in their mobile devices to the cloud. By offering an application for iOS mobile devices in addition to the previously launched application for Android OS mobile devices, more SkyDesk Services users can print files from their mobile devices.

Linking with Net Print to respond to mobile printing needs

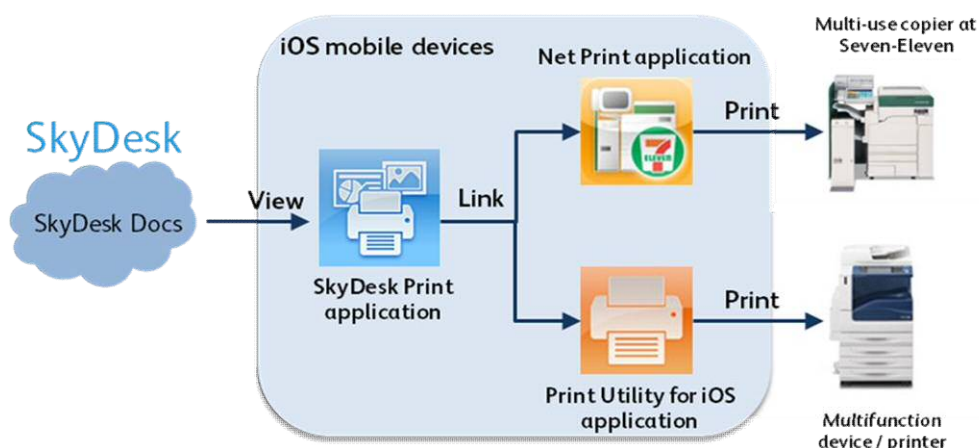

Through Fuji Xerox’s Net Print service, users can print files^{*4} viewed with SkyDesk Print from multi-use copiers^{*5} installed at approximately 15,200 Seven-Eleven stores across Japan. This answers to the printing needs that emerge during mobile work on smartphones.

Printing from multifunction devices and printers at offices

By linkage with Print Utility for iOS, a free-of-charge application for printing with multifunction devices and printers from iOS devices via a wireless LAN network, users can now directly print files^{*6} on the mobile devices from SkyDesk Print.

Viewing and printing DocuWorks^{*7} files

Additionally, in response to customers’ request, SkyDesk Print offers a function for viewing DocuWorks files stored in SkyDesk Docs, thereby enabling users to print those DocuWorks files.

Linkage between SkyDesk Print and other applications

To download the SkyDesk Print application, please access:
