Projects	With the mission of "leading a once-in-a-century mobility revolution," we established the Company in July 2018 to develop "Flying Cars" and "Cargo Drones" to realize the future of "Using the Sky for Daily Transportation". In the development of flying cars, we are the only company in Japan to conduct manned flight tests, and we are also involved in the design of the system as a member of the public-private sector council. We are currently developing a two-seater "flying car," with the target of entering into service in the Osaka Bay area in 2025.
